National Energy & Fuels Institute

Commodity Solutions by BAM Weather

Commodity Package + Clarity

Clarity Weather Platform:

Hourly & Daily Insights

When impactful weather is on the horizon, we will send out graphics and simulated radar to indicate when and where the greatest threats are.

Hi-Res Radar

Our hi-res radar uses MRMS data and updates every two minutes, delivering the fastest, most accurate coverage.

Custom Nowcasts

Receive custom insights straight from our meteorologists on the timing and potential impacts of approaching storm threats.

Long Range Forecasts

In the platform, you'll be able to easily access and see our long range forecasts, reports, and videos.

Energy Commodity Reports:

- **AM Model Analysis**
  - Detailed analysis of how models trended overnight and what the anticipated heating/ cooling demand is.
- **Long Range Report + Video**
  - Get a daily breakdown of the details that matter and be prepared for weather related to market moves.
- **PM Model Reports**
  - Mid-day analysis of the GFS model trends and signals. Description of forecast risks and where data may trend.
- **South American Pattern Analysis + Video**
